## Education

**Purdue University, West Lafayette, IN**                                            **May 2022**
Bachelor of Science in Electrical Engineering Technology

## Technical Skills

HTML, CSS, Javascript, React, Next.js, VSCode, Github.

## About Me

Creating an application that starts with an idea, for anyone to interact with on the internet, has fanscinated me. Being able to make an idea come to life with the use of various web technologies feels more than just work. It's an engaging process coming up with the solutions for how a website functions when a user is interacting with it. As ideas become more complex, the challenge and need to learn other technologies transforms into a rewarding journey to reach that end goal of making the idea come to life.

My projects are located below that demonstrate my skills and background as a Frontend Developer.

## Experience

### Dota 2 Club Website | React HTML CSS Javascript Next.js
Website: https://dota2clubpurdue.netlify.app
Repo: https://github.com/aaronzalez200/Purdue-DotaTeam-Nextjs
- Implemented routing and SEO using Next.js
- Developed for the Purdue Dota 2 Club to display competitive rosters and summarize the club for prospective members

### Dota 2 Player App | React HTML CSS Javascript
Website: https://dota2playerscouter.netlify.app
Repo: https://github.com/aaronzalez200/dota2player-scouter-WIP
- Implement routing using the framework/library from React Router
- Developed code for fetching API from OpenDota to streamline data from different end points onto a single page
- Adapted website for functionality on desktop and mobile using CSS grid
- Developed validation for API calls from user

### Esports Netflix Clone | React HTML CSS Javascript
Website: https://aaron-netflix-clone.netlify.app
Repo: https://github.com/aaronzalez200/netflix-clone
- Fetch data of videos from channels using the YouTube API
- Netflix-like horizontal scrolling

## Leadership

### Purdue University - Dota 2 Club President (2019-2022)
- Host on-campus events for members and students
- Plan and host callouts to bring in new members and retain current body
- Network with past alumnis to host events with current student body
